

REBUILT

ONLINE CAMPUS

An important part of the REBUILT webpage is the Online Campus, which contains learning material, which is highly relevant for all with an interest in climate change-related issues and how to deal with them.

The Online Campus consists of 4 parts:

- 1** The MOOC, which in 4 modules, takes the learner through climate scenarios, possible impacts of climate change, a glance at the future, and methods for responding to climate change.
- 2** The virtual library includes valuable online sources relating to the topics presented in the MOOC to allow the reader to devote oneself to further knowledge.
- 3** Good practices database illustrating different types of resources and tools to be used as part of business process reengineering and coping with climate change.
- 4** MOOC videos show the efforts of various companies working to adapt to and mitigate climate change.

REBUILT MOOC

We are happy to announce that the number of learners enrolled for the REBUILT MOOC has reached **753 persons**. Enrollment is still possible, as the partners have ensured that the MOOC platform will continue to work, even though the project is in its final phase.

The MOOC can be accessed easily by clicking this link to register: <https://learning.rebuilt-project.eu/>

Please note that the REBUILT MOOC is available in 6 languages. The learner can select the preferred language.

Co-funded by the
Erasmus+ Programme
of the European Union

FINAL REPORT

We have now reached the very final part of the REBUILT project. All activities in REBUILT have been finalized by the partners and preparations for the final reporting to the Danish Agency for Higher Education and Science have started.

As a result of an intensive and smooth cooperation, the consortium has now fulfilled the following milestones during the project period:

- 1** Creating the REBUILT learning programme (Result 1)
- 2** Building the REBUILT MOOC (Result 2)
- 3** Developing REBUILT low carbon transition action plan for businesses (Result 3)

You can read more about the project and the outcome on the REBUILT webpage here: <https://rebuilt-project.eu/>
